SUMMARY

Experienced full-stack web developer with expertise in the MERN stack (MongoDB, Express.js, React, Node.js), and proficiency in version control systems, C++, and C. understanding of data structures and algorithms, with a focus on creating scalable, efficient, and user-friendly responsive web applications.

SKILLS

- **Web Development:** Full-Stack Web Development, Responsive Web Design, UI/UX Development, Figma
- **Frontend Technologies:** HTML, CSS, Tailwind CSS, Bootstrap, React.js, JavaScript
- **Backend Technologies:** Node.js, Express.js
- **Database:** MongoDB, Sql, MySql
- **Programming Languages:** C++, C
- **Version Control:** Git, GitHub
- **Other Tools & Frameworks:** MERN Stack, RESTful APIs, Redux, Web Development Best Practices
- **Soft Skills:** Excellent communication, collaboration, problem-solving, time management, adaptability, leadership, emotional intelligence, creativity, and networking abilities.

EXPERIENCE

Pm Enterprises : Fullstack Developer

[21 July 2025]

- Designed and developed the complete User Interface (UI) for the NorthSling web application using React and Tailwind CSS.
- Built JWT-based authentication and authorization for secure login and role-based access.
- Developed the QueuePilot web application using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Collaborated with cross-functional teams to deliver smooth deployment and functionality testing.

WebcraftUi: Fullstack Developer (freelancing)

[7 March 2025]

- Developed and optimized a real-time analytics dashboard to monitor live data and improve user experience.
- Fixed multiple UI and functionality bugs, enhancing site stability and performance.
- Implemented design improvements and UI/UX enhancements for a more modern and responsive interface.
- Contributed 50%+ of the development work in building the official WebCraftUI website.
- Collaborated with the team to integrate frontend and backend modules, ensuring seamless deployment and performance.

PROJECTS

GetMyService :

[27 March 2025]

- Developed a full-stack MERN application that supports two user roles — Customer and Service Provider (e.g., electricians, drivers) — allowing service providers to register and manage profiles, and users to discover and contact them.
- Integrated real-time chat using Socket.IO, enabling instant communication between users and service providers with live message updates, enhancing user engagement.
- Built secure authentication and role-based access control using JWT and bcrypt, ensuring data privacy and differentiated access for both user types.

Password Manager :

[1 March 2025]

- Developed a secure Password Manager web application using MongoDB, Express.js, React.js, and Node.js, allowing users to store, view, edit, and delete their passwords in an encrypted format.
- Implemented a responsive UI with Tailwind CSS, ensuring seamless usability across devices, added authentication (JWT) to restrict access to authorized users only.

CERTIFICATIONS

- **Tailwind CSS Bootcamp** – Let'sUpgrade | Focused on responsive design with utility-first CSS.
- **JavaScript Bootcamp** – Let'sUpgrade | Learned JavaScript fundamentals, ES6, and DOM manipulation.

EDUCATION

- Pursuing a BCA degree from IFTM University Lodhipur Moradabad, focusing on webdevelopment [2023-Present] .
- Completed 12th (Intermediate) from the UP Board, with a strong academic foundation in core subjects. [2022-2023]
